The Ultimate Data Protection Trifecta with Veeam, Object First, and Wasabi

Unlock effortless data protection with the powerful trio of The Veeam Data Platform, Object First's Ootbi (Out-of-the-Box Immutability), and Wasabi Cloud Object Storage. This solution seamlessly implements the 3-2-1-1-0 data security best practice, giving you peace of mind that your data will be safe from cyber threats and physical damage. All while giving you the benefits of supercharged storage performance on-prem, and economical long-term data retention in the cloud.

Data Security, Data Recovery, and Data Freedom

Secure, Simple, Powerful, Immutable On-Prem Storage

Simple, Fast, Affordable, Immutable Cloud Storage

Resilient Data Protection with the 3-2-1-1-0 strategy

3 Copies of Data	2 Different Media Types	1 Copy Offsite	1 Copy Air-Gapped	0 Errors or Failures
Safeguard your data with three copies, including the production copy.	Mitigate risks by utilizing at least two distinct storage media types, guarding against the failure of any single storage device.	Establish Cyber Resilient Data Protection with at least one backup stored in a physically separated location, giving protection against physical damage.	Enhance security by maintaining at least one offline or immutable backup, providing an additional layer of defense against cyber threats.	Having backups alone is not enough. Regularly test your backups to ensure that they can be successfully restored.
✔ Met with Object First and Wasabi	✔ Met with Object First and Wasabi	✔ Met with Wasabi	✔ Exceeded with Object First and Wasabi	✔ Met with Veeam SureBackup and Object First

The strength of The Veeam Data Platform, Ootbi by Object First, and Wasabi Cloud Object Storage enables you to implement a comprehensive 3-2-1-1-0 data strategy, ensuring unmatched data security and integrity.
